

# FOOD

- Globally, beef production creates **more global warming gases** than transportation.
- The average distance that our food travels from farm to table is **1500 miles**.
- **Less than 2% of pesticides** reach the intended pest, with the rest ending up in the soil, air and water.
- Globally, food packaging costs **\$100 billion** per year.
- **1.8 million tons** of fast-food packaging are used and discarded in the US annually.

# FOOD

- One quarter-pounder requires **200 gallons** of water to produce — or **55 square feet** of rainforest, if the meat came from the tropics.
- For every pound of shrimp caught in the ocean, **10 pounds of other sea life** is killed.
- **90,000 children** work in the world's cocoa plantations — most for little or no pay.

**G**od said, 'See, I have given you every plant yielding seed that is upon the face of all the earth, and every tree with seed in its fruit; you shall have them for food.

—Genesis 1:29, NRSV
