

# TREES

- Trees are **essential to life on earth**, providing oxygen, cleaning the air, sorting carbon, regulating rainfall, preventing erosion and flooding, and providing habitat to creatures.
- The Amazon is losing over **an acre of forest** every second. The main cause is beef production: there are now **57 million cows** on pastures in former rainforest.
- In the US, **cypress trees**, which provide important buffers against storms and hurricanes along the southeast coast, are being cut down to make **lawn mulch**.

# TREES

- People living in the US use an average of **760 pounds of paper per year**. It takes **3 1/2 pounds of wood** and creates **3 pounds of CO<sub>2</sub>** to make **1 pound of paper**.
- Each year in the US we cut down **1 billion trees** to make our paper.
- US cities have lost **20 percent of their trees** in the past 10 years.

On either side of the river is the tree of life with its twelve kinds of fruit, producing its fruit each month; and the leaves of the tree are for the healing of the nations. —Revelation 22:2, NRSV

## What you can do:

- Don't consume products like beef and lumber when they come from the rainforest.
- Use less paper, buy recycled paper, recycle paper.
- Visit the rainforest on a Learning Tour; support forest preservation through NCP's If a Tree *Falls...* program.
